General guide for setting up an Airliner Wireless Slate©

(PC)

Stony Brook University
STEP 1

- Turn slate over and push “connect” button to transmit a discoverable bluetooth signal. Power button will flash blue for 2 minutes, or until it is paired with a computer.
STEP 2

• Insert USB bluetooth adapter, or turn on your computer’s bluetooth signal.
STEP 3

• Locate the bluetooth icon in the tray or in the control panel -> printers & other hardware. Double click “bluetooth devices” to add a device.
STEP 4

- Click “Add”, then check “My device is setup and ready to be found” and click “next”.

![Image of computer screens showing Bluetooth setup process]
STEP 5

• Allow computer to search for bluetooth devices. You should see “SMART Wireless slate” appear. Highlight it and click “Next”.
STEP 6

• Change passkey options to “Don’t use a pass key” and click next.
STEP 7

- PLEASE WAIT while the computer is installing the device…
STEP 8

- You will see “Your new hardware is installed and ready to use” in the tray. Click “Finish”. The power button will turn solid blue, confirming a successful pairing.
STEP 9

- Use the icons on the right of the tablet to choose pen colors, mouse functions, or tool options. The outlined area in the middle of the tablet corresponds to the computer desktop.
STEP 10

• At session’s end, shut off power to the tablet, and turn off the computer’s bluetooth signal, or remove the adapter.
STEP 11

• Please remember that this is a GENERAL help guide, as there are many variables when dealing with presentation equipment. Please contact our main office at (631) 632-9400 for further assistance.
