General guide for setting up & operating a Hard Drive Disc camcorder
STEP 1

- Unpack camcorder, power cable (or batteries), and tripod. Open tripod legs, and place on consistent, even ground, for safety.
STEP 2

• Loosen all fasteners and raise legs to a chest level height. Secure camcorder to tripod and tighten lock screw.
STEP 3

- Plug in power cord to electrical outlet, or load charged battery on dock at back of camera.
STEP 4

- Remove lens cap, and open LCD view screen. Make sure “still/video” switcher is set to video camera.
STEP 5

- Move mode selector into “camera” position to record. Slide “W-T” (wide-tele) lever to zoom in on, or zoom out of, your target location.
STEP 6

- Press “REC/SNAP” button at back of camera to record. LCD screen will say “REC” in the upper right corner to indicate that you are recording.
STEP 7

• Press “REC/SNAP” button to stop recording. Move mode selector to “PLAY (vcr)” position to review your recordings.
STEP 8

• At event’s end, stop recording, unplug camcorder, breakdown tripod, and return all parts to carry cases.
STEP 9

• Copy your files directly to your computer. In Windows, they can be viewed using VLC Media Player©. On a Macintosh, simply import your files using iMovie©.
STEP 10

- Please remember that this is a GENERAL help guide, as there are many variables when dealing with presentation equipment. Please contact our main office at (631) 632-9400 for further assistance.
