

How to Connect the iPhone or iPod touch to Stony Brook University's VPN Using the Junos Pulse Application

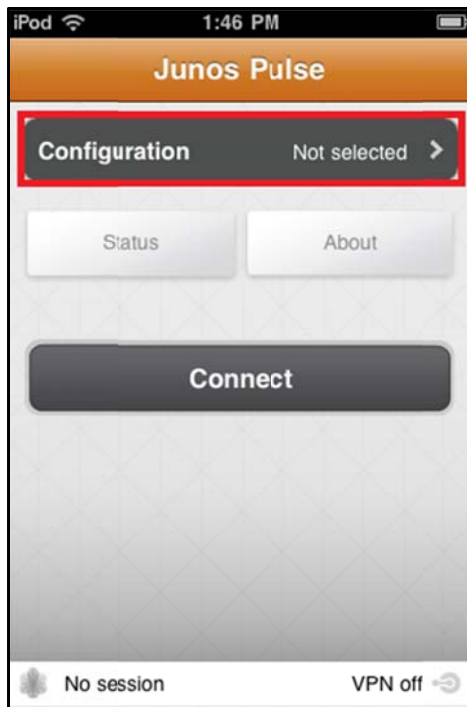

Step 1: Go to the App Store and type **Junos Pulse** into the search field.

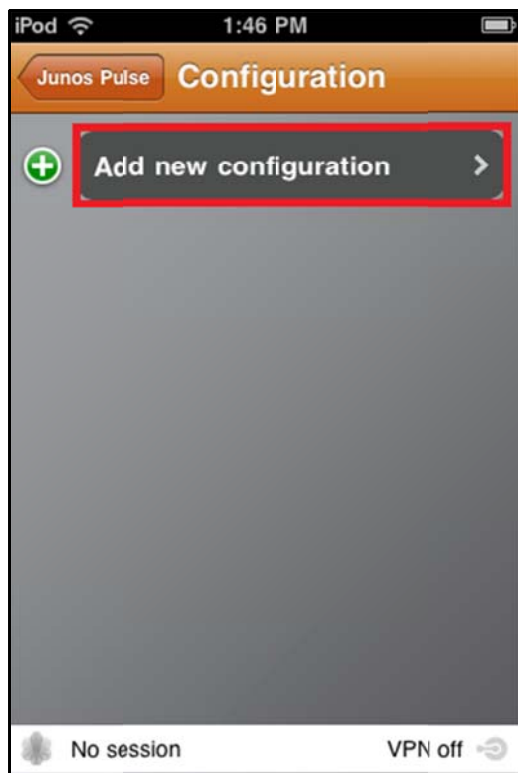

Step 2: Install the free **Junos Pulse** app.

Step 3: The **Junos Pulse** app will be downloaded to your device. Click on the **Junos Pulse** icon to open the application.

Step 4: Once the application opens, click on **Configuration**.

Step 5: When configuration is open, click on **Add new configuration**.

Step 6: Enter the following when asked to add information :

Name: SBU VPN

URL: sslj.wah.stonybrook.edu

Then click **Save** in the top right corner.

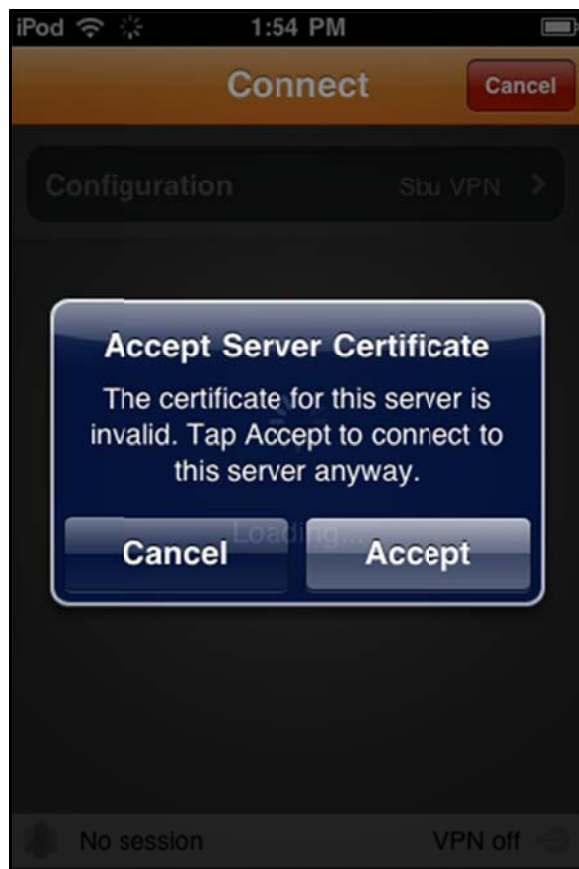

Step 7: The configuration is now set. Exit the Junos Pulse app and open **Settings**.

Step 8: Under **Settings** click on **Wi-Fi** and connect to your own personal network.

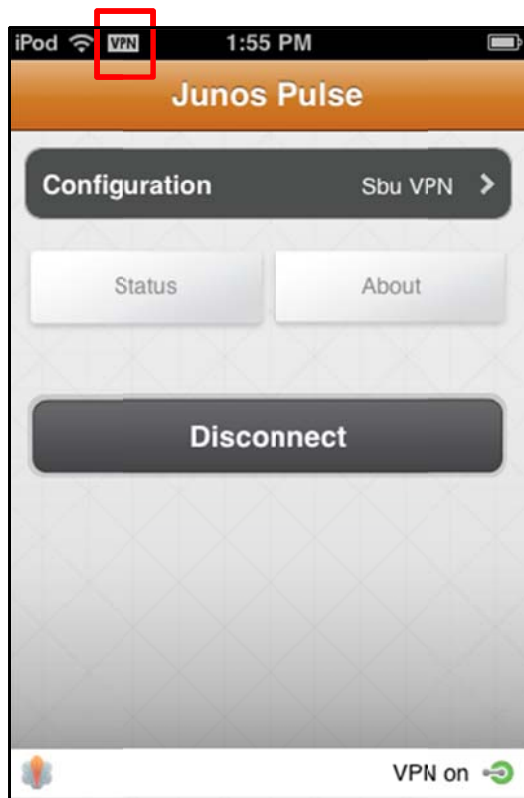

Step 9: Open the **Junos Pulse** app again.

Step 10: A Server Certificate notification will appear. Click **Accept**.

Step 11: Type in your Stony Brook **NetID** in the Username field and your **NetID Password** into the Password field.

Step 12: A successful connection is made when the **VPN** rectangle appears in the upper left-hand corner of the device.
