General guide
for setting up & operating
the Canon FS11 Flash Memory
camcorder

STEP 1

- Unpack camcorder, power cable (or batteries), and tripod. Open tripod legs, and place on consistent, even ground, for safety.

STEP 2

- Loosen all fasteners and raise legs to a chest level height. Secure camcorder to tripod and tighten lock screw.

Stony Brook University

STEP 3

- Plug in power cord to electrical outlet or open the battery compartment cover, then slide in the battery until you hear a click. Close the cover.

Stony Brook University

STEP 4

- Open the LCD view screen. Press the "ON/OFF" button on top of camera to power up the camcorder.

STEP 5

- Rotate the mode selector to 🎥 "Video Record". Slide "W-T" (wide-tele) lever to zoom in on, or zoom out of, your target location.

Stony Brook University

STEP 6

- Press the START/STOP button at the back of camera to record. The LCD screen will show a red dot in the upper right corner to indicate that you are recording.

Stony Brook University

STEP 7

- Press the START/STOP button at the back of camera to stop recording. Rotate mode selector to 📹 "Play Video" position to review your recordings.

STEP 8

- At event's end unplug camcorder, breakdown tripod, and return all parts to carry cases.

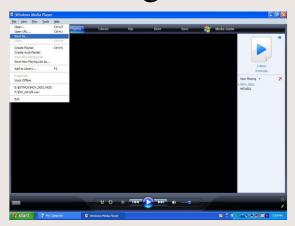

Stony Brook University

STEP 9

- To transfer recordings, connect the camera to a computer via the USB port, plug in the power adapter and rotate mode selector to "Play Video". Press the ON/OFF button, and when prompted, choose "PC/PRINTER" using the joystick. Press "SET" to confirm.
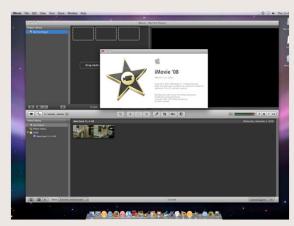

STEP 10

- Copy your files directly to your computer. In Windows, they can be viewed using VLC Media Player©. On a Macintosh, Import your files using iMovie©.
