Help Guide for JLC 100-103 Computer Users
STEP 1

- Touch 10” black view panel to “wake up” system. Touch blue strip labeled “touch screen to begin”.
STEP 2

• Enter into “novice” or “experienced”, dependent on your familiarity with the system.
STEP 3

- The main screen will appear. The yellow bars on the left are the media sources which you can choose from. Lights, volume, and screen controls are on the right.
STEP 4

- Turn on data projector. Touch “on” in the lower left of the screen. “Projector status” bar will turn green, and a standby screen will project in 90 seconds.
STEP 5

- Choose PC & AUX, then choose Computer Main ("Lectern PC"). Use the blue bars at the bottom to designate where you want to send the image.
STEP 6

- **Video Projector** is the projector behind the glass screen. Pressing video projector displays the image to the audience. **Booth VCR/MON** is a monitor in the projection room. **Lectern Monitor** is the 15” screen at your left. **Touch Panel** is the 3” view screen within the control system.
STEP 7

• Turn on computer, and choose your platform.
STEP 8

• Log in using your Net ID & Net ID password.
STEP 9

- At session’s end, shut down all equipment and press “exit” in the lower left corner of the touch panel. If you are sure you want to exit, choose “yes”.
