Help guide for Light Engineering 102

(Video users)
STEP 1

• Locate white control box on front of lectern to operate projector.
STEP 2

- Press “pwr” button, 1st button on left to power up projector. Press button only once! Projector takes 45 seconds – 1 minute to achieve full lamp power (you should get a blue screen).
STEP 3

• Press “VID” button until upper right of projection screen says “video”.

![Projection screen](image2.jpg)
STEP 4

- Match cables to ports for “video”, “left audio”, and “right audio”, on left side of lectern.
STEP 5

- Hook up other end of video & audio cables to matching “outs” on corresponding video source.
STEP 6

- Press “play”. You should now see your projected image on screen.
STEP 7

- At session’s end, disconnect cables and unplug deck.
STEP 8

• Please be sure to turn off projector! To turn off, hold down “pwr” button for 2-3 seconds. If you need additional assistance, please contact our support office at (631) 632-9400.
